

CONTROL DEVICE OF ENVIRONMENT CONTROL MEANS

ABSTRACT

5 There is provided an environment-control-means control apparatus capable of making states of a plurality of subject persons more likely to be changed as desired. An environmental equipment control apparatus (100) that controls an environment of a room where a plurality of subject persons are present using an air conditioner (10) and a lighting apparatus (20) that serve as a plurality of kinds of environment control means, includes a
10 control performing unit (90) that controls the air conditioner (10) and the lighting apparatus (20) such that the arousal levels of the plurality of subject persons grasped by a current arousal level grasping unit (61) are in or approach a range of target arousal levels grasped by the current arousal level grasping unit (61).
