

Compressor and method for compressing a working medium

Abstract

The invention relates to a compressor (1) and to a method for compressing a working medium, having: a compressor piston (2) that compresses a working medium, a seal (4) for sealing off the compressor piston (2), a magazine (7) which contains a plurality of replacement seals (8), a changing device (11) for exchanging the seal (4) with one of the replacement seals (8) in the magazine (7), wherein the central axes (10) of the replacement seals (8) are arranged so as to be substantially aligned along a longitudinal axis (A2) of the magazine (7).
