(54) Title: ELECTRICAL POWER CONNECTOR

(57) Abstract: Electrical connectors (200) can include thermally conductive material in regions proximate contacts (204) residing therein to sink heat away from the contacts (204). The thermally-conductive materials (22/62/64), can be provided in the housing (20/60) structure of the connectors (200). The thermally-conductive material (206) can also be provided as a thermally-conductive member (206) distinct from the housing (20/60).
