(54) Title: PROCESSING DATA SERVICE

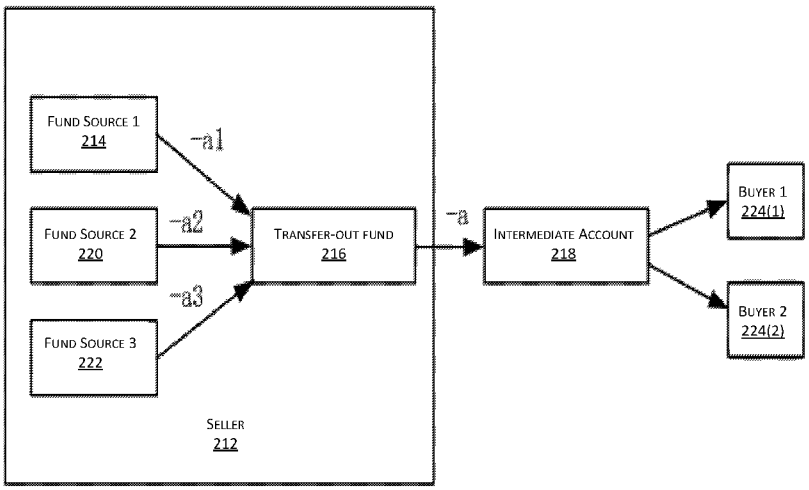

FIG. 2B

(57) Abstract: An example method for processing data service includes the following operations: acquiring a data service request initiated by a first user to a second user, the data service request carrying a service limit of the data service; acquiring a data source list adopted by the second user in accordance with the data service request; and transferring an amount of funds for the service limit to a first account corresponding to the first user in accordance with the data source list. The technical solution of the present disclosure transfers a service limit to the first account corresponding to the first user in accordance with the data source list, which avoids an interruption of the data service caused by an insufficient single data source, and thus facilitates the data service, and enhances a quality of service of the data service.
