(54) Title: DOWNHOLE APPARATUS

(57) Abstract: Downhole apparatus comprises first (10) and second (12) tools for location in a tubing string. The first tool has a first seat (22a) of a first diameter and the second tool has a second seat (22b) of a second diameter larger than the first diameter. First and second activating devices (30) are provided for use in activating the respective first and second tools. The first activating device includes a first activating profile (34) having an extended diameter larger than the first diameter and smaller than the second diameter and a retracted diameter smaller than the first diameter. The second activating device includes a second activating profile having an extended diameter larger than the second diameter and a retracted diameter smaller than the first diameter.
