

SORTING DEVICE AND SLAT

[ABSTRACT]

[Object] A sorting device capable of sorting articles appropriately is provided.

[Solution Means] The sorting device includes a conveying means 3 having a plurality of slats 2, for conveying articles. The conveying means 3 includes a plurality of pushing members 5 that push and sort the articles by sliding in relation to the slat 2. The slat 2 includes a body portion 41 having a plurality of tubular parts 40. A mounting plate 42 on which an article is mounted is provided on an upper portion of the body portion 41. A guiding portion 43 that guides the pushing member 5 is provided on each tubular part 40 of the body portion 41 in a protruding manner.
