ABSTRACT OF THE DISCLOSURE (FIG. 4)

"DISK DRIVE STRUCTURE HAVING HOLDING PORTIONS
FOR PROTECTING A CONTROL CIRCUIT BOARD"

5

A disk drive includes a substantially rectangular
box-shaped casing having a rectangular mounting
surface. In the casing are arranged a disk drive
mechanism. A rectangular control circuit board is
10 mounted on the mounting surface of the casing. The
control circuit board has four sides aligned with the
four sides of the mounting surface, and four corners
have recesses to expose the four corners of the
mounting surface to permit handling of the disk drive
15 without damaging the control circuit board.
