- (54) **Title:** METHODS OF IMPROVING RAAV PRODUCTION

FIG. 7B

(57) **Abstract:** This disclosure relates to methods and compositions for scaling up production of rAAV by cell cultures. In some aspects, the present disclosure relates to methods of transferring a plurality of transfection complexes to a bioreactor. Also provided are methods of improving production of recombinant adeno-associated virus (rAAV) particles by adding a second medium to the cell culture after transfection, thereby improving rAAV particle yield and reducing the amount of time needed to produce high levels of rAAV particles.
