

ABSTRACT:

A chimeric compound for targeted degradation of androgen receptor protein, a preparation method therefor, and a medical use thereof. Specifically, the present invention relates to a spiro compound represented by general formula (I), a preparation method
5 therefor, a pharmaceutical composition containing the spiro compound, and uses thereof as a therapeutic agent, in particular a use as an androgen receptor degradation agent and a use in the preparation of a drug for treating and/or preventing androgen receptor mediated or dependent diseases or conditions.
