(54) **Title:** USING LOCAL ILLUMINATION COMPENSATION AND DELTA MOTION VECTOR REFINEMENT TOGETHER
IN VIDEO CODING

FIG. 18

(57) **Abstract:** Example devices, methods, and computer-readable media are described. An example method includes determining to decode a current block of the video data using a merge mode. The example method includes determining, for the current block, to apply local illumination compensation (LIC). The example method includes determining, for the current block, to apply decoder side motion vector refinement (DMVR). The example method includes decoding the current block based on applying LIC and applying DMVR.
