

ABSTRACT

Problems: To provide a cable unit that can save space for a work space, and a liquid material supply device and an application device including the cable unit.

- 5 Solution: A cable unit 30 that detachably and electrically connects a discharge head 10 configured to discharge a liquid material with a relative-moving robot 20 configured to carry out relative movement between the discharge head 10 and a workpiece 25 , the cable unit having a dispense controller 33 configured to control a discharge operation of the discharge head 10, and a liquid material supply device and an application device
- 10 including the cable unit.
