(54) Title: INTRA RANDOM ACCESS POINTS FOR PICTURE CODING

3000

performing a conversion between a video having
one or more video layers comprising one or more
video pictures and a coded representation of the
video

3002

FIG. 3

(57) Abstract: Methods and apparatus for video processing such as video coding or decoding are described. One example video processing method includes performing a conversion between a video having one or more video layers comprising one or more video pictures and a bitstream of the video according to a format rule, and wherein the format rule specifies that a first video picture that is an associated intra random access point picture of a second picture and the second picture are constrained to belong to a same video layer.
