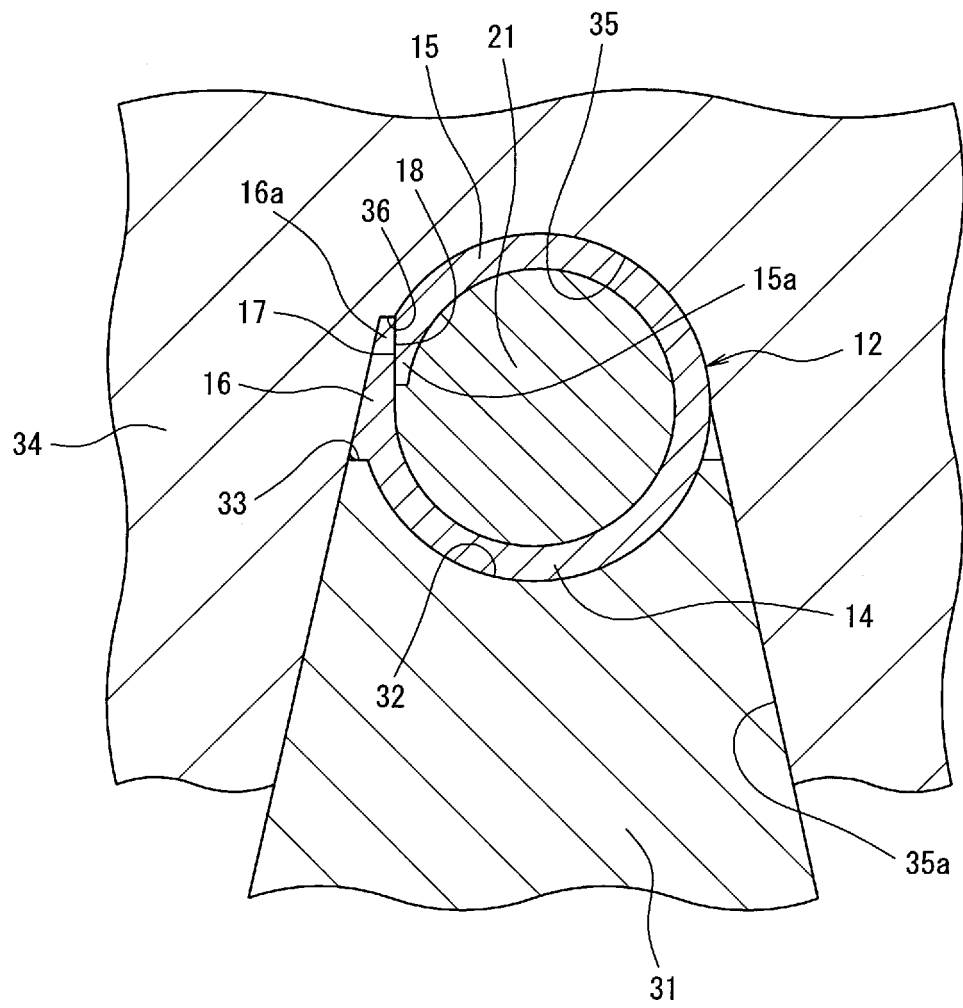

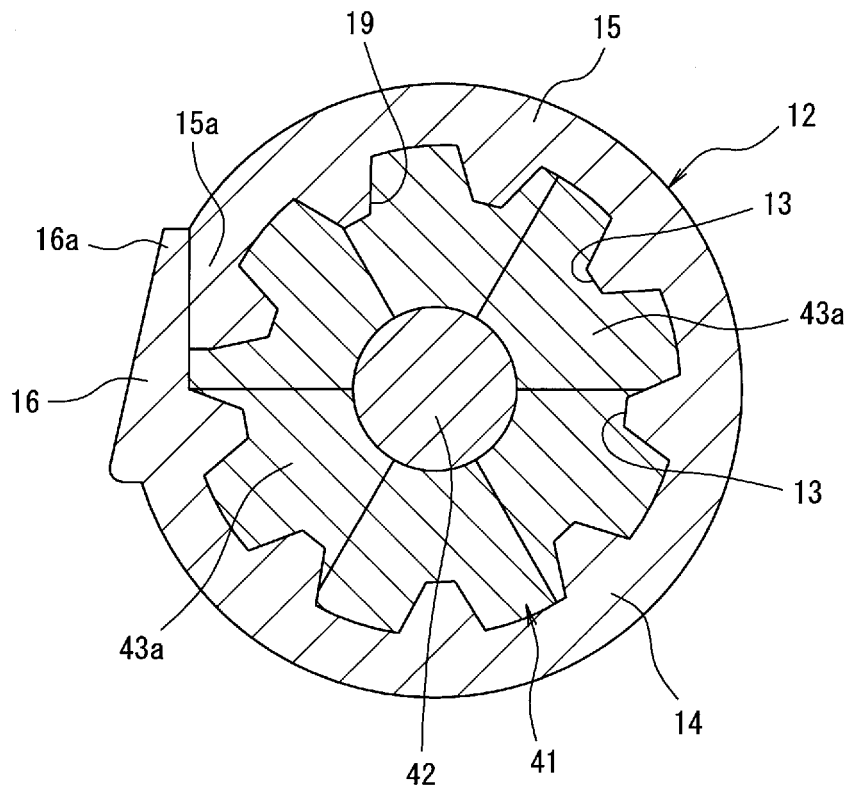

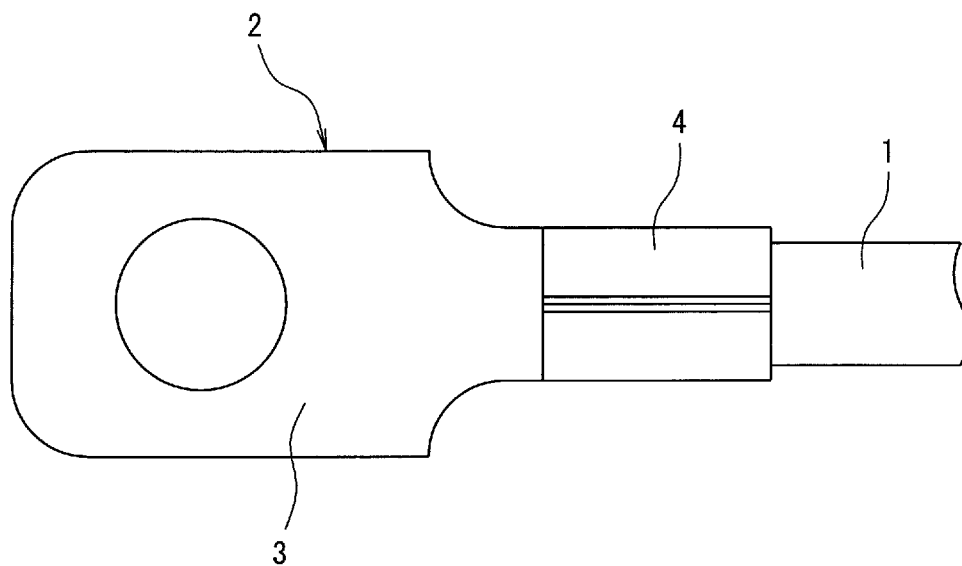

FIG. 1 is a cross-sectional view of a circular gear assembly. A central gear (13) is mounted on a shaft (14). The gear has teeth (15) and a central hub (19). The gear is surrounded by a housing (12) with a flange (16) and a seal (15a). The housing is secured by a bolt (16a). The gear is shown in a cross-section with diagonal hatching.
