

ABSTRACT

According to one aspect of the present invention, provided is a skin adhesive sheet 1 including an adhesive agent 2 having a base material layer 5 and a sticky material layer 6 laminated on a back surface side of the base material layer 5, a release paper 3 provided to cover the sticky material layer 6, a protective film 4 provided to cover a front surface side of the base material layer 5, a first slit 7 to divide the adhesive agent 2 into a main body part 8 to be made adhere to a skin Sk when used and a removal part 9 to be removed when used, and a second slit 11 to divide the release paper 3 into a peel part 12 to be peeled when used and a holding part 13 to be held by a user when used. The adhesive agent 2 is formed so as to have a cross-sectional area S decreasing from the main body part 8 toward a portion near the first slit 7 and increasing from the portion near the first slit 7 toward the removal part 9.

FIG. 3
