(54) Title: LOCKOUT TAGOUT DEVICE AND VALVE

FIG. 3

(57) Abstract: A valve assembly (10) including a valve housing (18) and a handle (40) that is movable about an actuation axis (Y) to actuate a valve actuator (34) within the valve housing between an open position and a closed position. The handle has a first opening (46) and the valve housing has a second opening (44). When the valve actuator is in the closed position the first opening aligns with the second opening to enable receipt of a lockout member (50) that prevents movement of the valve actuator from the closed position to the open position.
