

ABSTRACT
CHANNEL MEASUREMENT METHOD AND APPARATUS, ELECTRONIC
DEVICE AND COMPUTER-READABLE STORAGE MEDIUM

5

The present disclosure provides a channel measurement method and apparatus, an electronic device and a computer-readable storage medium. The method includes: separately determining, by each first device, a first mask sequence, and transforming the first mask sequence to obtain a second mask sequence, and processing a first
10 measurement sequence with the second mask sequence to obtain a second measurement sequence, where the first mask sequence corresponds to the first device; and carrying, by the first device, the second measurement sequence in a channel measurement frame, and sending the channel measurement frame to at least one second device for channel measurement.
