COMPRESSION POUCH FOR STORING OUTERS

ABSTRACT

The present invention relates to a compression pouch for storing outers, comprising: a pouch body having a storage space for storing at least one outer garment; a compression section formed on a side surface of the pouch body, configured to compress the storage space as a zipper is fastened; and a pair of protruding hook portions respectively positioned at upper ends of a front portion and a rear portion of the pouch body, formed in an upward direction of the pouch body, wherein the pair of protruding hook portions have a shape capable of being hung on and fixed to a hanging rod.
