(54) Title: A LOCKER SYSTEM AND METHOD

FIG. 1

(57) Abstract: The present disclosure describes a system for managing a plurality of lockers proximate a theme park attraction, the system having an electronically actuated lock disposed on the plurality of lockers, a guest identifier carriable on the guests person, the identifier usable as an electronic key configured to lock and unlock the lock, an egress sensor positioned at an exit of the theme park attraction and a processor in communication with the lock and the egress sensor and configured to unlock the lock subsequent to being signaled by the egress sensor. A method for using and managing a plurality of lockers is also described.
