

[NAME OF DOCUMENT] ABSTRACT OF THE DISCLOSURE

(Abstract)

(Subject)

A reliable, compact vacuum switchgear is provided
5 at an inexpensive cost. The vacuum switchgear
comprises a switch 1 having a fixed electrode 12 and a
movable electrode 13 connectable to and disconnectable
from the fixed electrode 12, another switch 2 having a
fixed electrode 22 and a movable electrode 23
10 connectable to and disconnectable from the fixed
electrode 22, conductors 3 connected to the fixed
electrodes 12, 22 of the switches 1, 2, earthing
switches 4 connected to the conductors 3, a mold
section 7 formed by molding the conductors 3 and the
15 earthing switches 4 with resin, and a vacuum container
8 accommodating the switches 1, 2 and disposed on the
mold section 7.
