(54) Title: CONTROLLER

FIG. 1A

(57) Abstract: According to various embodiments, there may be provided a controller. The controller may include a controller body. The controller body may include a main portion, and a handle portion extending from the main portion. The controller may further include one or more control elements arranged at a control surface of the main portion. Further, the controller may include a strap adjustment mechanism at a side of the controller body. The strap adjustment mechanism may include a movable tab that is movable between a first position proximal to the control surface of the main portion of the controller body and a second position distal from the control surface of the main portion of the controller body.
