(54) Title: FOOD CARRIER

Figure 1

(57) Abstract: A food carrier configured for use in decorating, storing, serving and transporting food in a single device. The food carrier includes a turntable base having a body and a rotating member that rotates about a central axis relative to the body, a serving platter configured to removably secure to the turntable base; and a lid configured to engage the turntable base. The turntable base has a plurality of locking mechanisms to secure the rotating member relative to the body. The lid may be lockable to the turntable base by at least one locking mechanism.
