(54) Title: POWER EFFICIENT RESOURCE UTILIZATION FOR V2X COMMUNICATIONS

Fig. 2

(57) Abstract: A pedestrian related vehicle-to-Everything (V2X) user equipment (UE) which comprises: receiving circuitry configured to receive system information which contains a parameter set for pedestrian related V2X communications; and controlling circuitry configured to determine, based on the parameter set, whether the pedestrian related V2X UE performs random selection or the pedestrian related V2X UE performs sensing.
