(54) Title: TARGET VIRTUAL OBJECT DETERMINATION METHOD AND APPARATUS, AND TERMINAL, AND STORAGE MEDIUM

(54) 发明名称: 目标虚拟对象确定方法、装置、终端及存储介质

- 201 In response to a trigger operation of a target skill of a controlled virtual object, a terminal determines a target search range corresponding to the target skill, the controlled virtual object being a virtual object controlled by a terminal user
- 202 In response to the fact that at least two first virtual objects exist in the target search range, the terminal obtains, from the at least two first virtual objects, at least one second virtual object that meets a defeated condition, the first virtual objects being virtual objects belonging to a different object set from the controlled virtual object
- 203 The terminal obtains, from at least one second virtual object, a third virtual object that meets a target hit condition of the terminal user, and uses the third virtual object as a target virtual object hit by the target skill

图 2

(57) Abstract: A target virtual object determination method and apparatus, and a terminal, and a storage medium. The method comprises: in response to a trigger operation of a target skill of a controlled virtual object (501), determining a target search range corresponding to the target skill, the controlled virtual object (501) being a virtual object controlled by a terminal user; in response to the fact that at least two first virtual objects (502, 503) exist in the target search range, obtaining, from the at least two first virtual objects (502, 503), at least one second virtual object that meets a defeated condition, the first virtual objects being virtual objects belonging to a different camp from the controlled virtual object (501); and obtaining, from at least one second virtual object, a third virtual object that meets a target hit condition of the terminal user, and using the third virtual object as a target virtual object hit by the target skill.

(57) 摘要: 一种目标虚拟对象确定方法、装置、终端及存储介质。其中方法包括: 响应于被控虚拟对象 (501) 的目标技能的触发操作, 确定目标技能对应的目标搜索范围, 被控虚拟对象 (501) 为终端用户控制的虚拟对象; 响应于在目标搜索范围中存在至少两个第一虚拟对象 (502、503), 从至少两个第一虚拟对象 (502、503) 中, 获取符合被击败条件的至少一个第二虚拟对象, 第一虚拟对象为与被控虚拟对象 (501) 属于不同阵营的虚拟对象; 从至少一个第二虚拟对象中, 获取符合终端用户的目标命中条件的第三虚拟对象, 将第三虚拟对象作为被目标技能命中的目标虚拟对象。
