

ABSTRACT

The present disclosure relates to a washing method and apparatus for a floor cleaning device, and a cleaning apparatus. The washing method for the floor cleaning device includes: obtaining a washing instruction; and controlling, based on the washing instruction, water supply to a washing tank of a floor cleaning device base station and to a cleaning member of a mobile cleaning portion. According to the technical solution of the present disclosure, the cleaning member is washed through supplying water to the washing tank of the floor cleaning device base station and to the cleaning member of the mobile cleaning portion. Therefore, a washing efficiency for the cleaning member is improved.
