(54) Title: FOLDING AND STACKING CONFIGURATION FOR WET WIPES

(57) Abstract

The present invention relates to wet wipes for use in wiping surfaces in the home and in industry, in addition to their use on the human body such as for baby wipes, make-up removal and other skin care applications. The wet wipes (1) are folded and interleaved with one another to provide an improved stacking configuration whereby each wipe can be readily singly separated from the wet wipe stack (23) by the consumer.
