

DUMMY DISK, DRESSING DISK, AND SURFACE HEIGHT MEASUREMENT
METHOD USING DUMMY DISK

ABSTRACT

5

Provided is a dummy disk which enables a surface height measurement instrument to accurately measure heights of a table surface of a polishing table. A dummy disk 80 is fixed to a disk holder 52 of a dresser 50 when heights of a table surface 14 of a polishing table 12 are measured. The dummy disk 80 includes a first surface 81 capable of coming into contact with the disk holder 52 and a second surface 82 which is on an opposite side of the first surface 81. The second surface 82 has a plurality of liquid discharge channels 88, and the plurality of liquid discharge channels 88 extends from one end of the second surface 82 to the other end.
