(54) Title: A UNIT FOR A MODULE SYSTEM FOR AN UNDERGROUND STORMWATER RETENTION BASIN, PARTS FOR A MODULE SYSTEM, AN UNDERGROUND STORMWATER RETENTION BASIN, A METHOD AND A USE OF A PLURALITY OF UNITS FOR BUILDING AN UNDERGROUND STORMWATER RETENTION BASIN

Fig. 1

(57) Abstract: The invention relates to parts for a module system for use as an underground stormwater retention basin, where the module system parts consist of a plurality of watertight three-dimensional units such as cuboids. Each of the watertight three-dimensional units has one or more through holes selected from a female through hole and a male through hole. A female through hole is for insertion of a flange of a male through hole. A male through hole has a flange for insertion into a female through hole. The invention also relates to various additional parts for the module system of the underground stormwater retention basin, to methods of building an underground stormwater retention basin and to a use of an underground stormwater retention basin.
