(54) Title: METHOD OF SYNTHESIS

(57) Abstract: The present invention provides a method for the preparation of a radiolabelled guanidine derivative, in particular wherein the radiolabelled guanidine derivative is a positron emission tomography (PET) tracer. Certain intermediates useful in said method are also provided, as well as means for carrying out said method in an automated fashion. The method of the invention provides advantages over known methods for the preparation of radiolabelled guanidine derivatives.
