

ABSTRACT

A FOLDABLE COVERING SUITABLE FOR USE WITH A BOX AND A PACKAGING ASSEMBLY IN ASSOCIATION THEREWITH

There is provided a foldable covering which can be suitable for use with a box. The foldable covering can be removably coupled to the box to form a packaging assembly. The foldable covering can be shaped and dimensioned in a manner so as to be capable of being in either a two-dimensional (2D) configuration or a three-dimensional (3D) configuration. When in the 2D configuration, the foldable covering can be laid against a flat surface. Moreover, when in the 3D configuration, the foldable covering can be coupled to the box in a form-fitting manner in that the foldable covering is in a shape which conforms to that of the box.
