(54) Title: LOAD CONTROL

FIG. 1

(57) Abstract: A system for providing load control. The system comprises an electric meter connected to a power network, one or more end devices connected to the electric meter, and a controller. Each end device comprises a load control switch, a controller, and a communication interface. The load control switch is configured to control the load supplied to or received from the end device by the power network. The controller is configured to control the load control switch responsive to receiving a first control signal via the communication interface.
