Abstract

PROGRAM AND METHOD FOR CONTROLLING INFORMATION TERMINAL

A control method of the present disclosure causes a computer of an information apparatus to: display an operation icon on a display screen of the information apparatus, the operation icon causing an operation screen for an electric shutter device to be displayed; display the operation screen for the electric shutter device when selection of the operation icon is sensed, the operation screen including a shutter image representing the shutter of the electric shutter device; and when a pinch-out operation is sensed on the operation screen, output to the network a movement control command for moving the shutter of the electric shutter device in a swipe direction of the swipe operation.
