(54) Title: A METHOD FOR TREATING DIABETES, HYPERGLYCEMIA AND HYPOGLYCEMIA

(57) Abstract

Methods are disclosed for controlling serum glucose levels in a mammal comprising ingestion of a stabilized rice bran derivative, specifically a solubilized fraction, an insolubilized fraction, an enzyme treated stabilized rice bran, or mixtures thereof. These methods may be used to manage diabetes mellitus and hyperglycemia. A diabetic food kit comprising a stabilized rice bran derivative, a non-rice consumable, and instructions for ingestion is also disclosed.
