

WIPING TIP

ABSTRACT

5 A wiping tip (1) includes a hollow cylindrical member (10), and a cotton-like
wiping member (20) arranged on the cylindrical member (10). The cotton-like wiping
member (20) constitutes a thin film portion (21) covering an opening at an end of the
cylindrical member (10), and an outer circumferential portion (23) extending from the
thin film portion (21) and covering an outer circumferential face of the cylindrical
member (10) over a predetermined length from the end.
