

ARYL OR HETEROARYL DERIVATIVE

[ABSTRACT]

- 5 A compound indicated by formula (I) or a pharmacologically acceptable salt thereof is provided as a compound that can be a therapeutic or prophylactic drug for TRPC6-related diseases, such as nephrotic syndrome, membranous nephropathy, acute renal failure, septicemia, chronic renal failure, diabetic nephropathy, pulmonary hypertension, acute lung injury, heart failure, malignant tumor, and muscular dystrophy. (In the
10 formula, Ar¹, Ar², X¹-X³, R¹, R³, R⁷, R⁸, L¹, and L² are as defined in the specifications.)
