Claims

1. A skin cleansing composition comprising the following components (A), (B), and (C):
(A) from 0.5 to 40 mass% of an ether oil in a liquid state at 25°C,
(B) from 0.01 to 5 mass% of a nonionic water-soluble polymer comprising cellulose as a constitutional unit selected from the group consisting of methylcellulose, ethylcellulose, hydroxyethylcellulose, hydroxypropylcellulose, and hydroxypropylmethylcellulose, and
(C) water, and
1 mass% or less of a nonionic surfactant, wherein the mass ratio of the component (B) to the component (A), (B)/(A) is from 0.001 to 5.

2. The skin cleansing composition according to claim 1, wherein the mass ratio of the component (A) to the whole oil phase, ((A) / whole oil phase amount)) is 0.05 or more.

3. The skin cleansing composition according to claim 1 or 2, wherein the component (A) is a dialkyl ether having two alkyl groups each having 16 or less of carbon atom.

4. The skin cleansing composition according to claim 1 or 2, wherein the component (A) is a dialkyl ether having two alkyl groups each having 8 or less of carbon atom.

5. The skin cleansing composition according to any one of claims 1 to 4, wherein the component (B) is hydroxyethylcellulose.

6. The cleansing composition according to any one of claims 1 to 5, further comprising (D) a hydrocarbon oil having a viscosity of 30 mPa·s or lower at 30°C.

7. The cleansing composition according to any one of claims 1 to 6, further comprising (E) a water-soluble polymer comprising acrylic acid or methacrylic acid as a constitutional unit.

8. The cleansing composition according to any one of claims 1 to 7, further comprising (F) a water-soluble solvent.

9. The skin cleansing composition according to any one of claims 1 to 8, wherein the mass ratio of the component (A) to the component (C), (A)/(C) is from 0.005 to 1.

10. The skin cleansing composition according to any one of claims 6 to 9, wherein the mass ratio between the

component (A) and the component (D), (A)/((A) + (D)) is from 0.05 to 0.8.

Claims

1. A skin cleansing composition comprising the following components (A), (B), and (C):
(A) from 0.5 to 40 mass% of an ether oil in a liquid state at 25°C,
(B) from 0.01 to 5 mass% of a nonionic water-soluble polymer comprising cellulose as a constitutional unit selected from the group consisting of methylcellulose, ethylcellulose, hydroxyethylcellulose, hydroxypropylcellulose, and hydroxypropylmethylcellulose, and
(C) water, and
1 mass% or less of a nonionic surfactant, wherein
the mass ratio of the component (B) to the component (A), (B)/(A) is from 0.001 to 5.

2. The skin cleansing composition according to claim 1, wherein the mass ratio of the component (A) to the whole oil phase, ((A) / whole oil phase amount)) is 0.05 or more.

3. The skin cleansing composition according to claim 1 or 2, wherein the component (A) is a dialkyl ether having two alkyl groups each having 16 or less of carbon atom.

4. The skin cleansing composition according to claim 1 or 2, wherein the component (A) is a dialkyl ether having two alkyl groups each having 8 or less of carbon atom.

5. The skin cleansing composition according to any one of claims 1 to 4, wherein the component (B) is hydroxyethylcellulose.

6. The skin cleansing composition according to any one of claims 1 to 5, further comprising (D) a hydrocarbon oil having a viscosity of 30 mPa·s or lower at 30°C.

7. The skin cleansing composition according to any one of claims 1 to 6, further comprising (E) a water-soluble polymer comprising acrylic acid or methacrylic acid as a constitutional unit.

8. The skin cleansing composition according to any one of claims 1 to 7, further comprising (F) a water-soluble solvent.

9. The skin cleansing composition according to any one of claims 1 to 8, wherein the mass ratio of the component (A) to the component (C), (A)/(C) is from 0.005 to 1.

10. The skin cleansing composition according to any one of claims 6 to 9, wherein the mass ratio between the component (A) and the component (D), (A)/((A) + (D)) is from 0.05 to 0.8.

11. The skin cleansing composition according to any one of claims 1 to 10, for cleansing a makeup cosmetic applied on the face.

12. The skin cleansing composition according to any one of claims 1 to 10, wherein the skin cleansing composition is used for cleansing a makeup cosmetic applied on the face, in the form of a sheet impregnated therewith.

13. Use of the skin cleansing composition according to any one of claims 1 to 10 for the production of a cleansing agent for cleansing a makeup cosmetic applied on the face.

14. Use of the skin cleansing composition according to any one of claims 1 to 10 for the production of a cleansing agent for cleansing a makeup cosmetic applied on the face, wherein the cleansing agent is used such that a sheet is impregnated with the cleansing agent and the face is wiped with the sheet.
