

ABSTRACT

The present invention aims to provide a rebaudioside A-containing beverage, a production method thereof, and a
5 method of reducing bitterness of rebaudioside A, wherein
the bitterness of rebaudioside A, particularly the bitter
aftertaste of rebaudioside A, is reduced. The present
invention relates to a rebaudioside A-containing beverage
containing rebaudioside A at a concentration of 30 to 2000
10 ppm and an ethyl glycoside at a concentration of 5 to 5000
ppm.
