(54) Title: FUEL COMPOSITIONS

Figure 1

(57) Abstract: A fuel composition comprising a base fuel and an additive mixture, wherein the base fuel comprises a renewable fuel component and wherein the additive mixture comprises: (i) a first additive which comprises a long chain carboxylic acid polyamine; and (ii) a second additive which comprises an ionic or non-ionic, oil-soluble polar organic, nitrogen-containing compound having a single nitrogen atom per molecule; wherein the weight ratio of the first additive to the second additive is in the range from 6:1 to 2:1. The additive mixture enables an improvement in the cold flow properties (cloud point and CFPP) of the renewable fuel component.
