(54) Title: SYSTEMS METHODS, AND COMPUTER PROGRAM PRODUCTS FOR CONFIGURABLE MAPPING OF DATA ELEMENTS

Fig. 1

(57) Abstract: Describes embodiments generally relate to a computer-implemented method comprising: determining a data source comprising a plurality of data elements, each data element being associated with a respective data element identifier; determining a user-defined configuration file for configuring a user interface, the configuration file comprising one or more of the data element identifiers, and for each of the one or more data element identifiers, a respective field identifier corresponding to a field of the user interface; determining the one or more of the plurality of data elements from the data source associated with the respective data element identifiers; determining generic list items and associated generic data; determining user interface configuration data based on the user-defined configuration file, the data elements, the generic list items and the associated generic data; and providing the user interface configuration data to a client device for generating the user interface.
