(54) Title: SUPPORTING INTER-TECHNOLOGY HANDOVER USING IEEE 802.16 HANDOVER PROCEDURES

(57) Abstract: A method for performing an inter-technology handover in a wireless communication system in which a mobile subscriber station (MSS) changes base stations (BS) begins by locating one or more target BSs that the MSS can handover to. The technology used by each target BS is identified, and the technology supported by the MSS is determined. A handover of the MSS is performed to a target BS with which the MSS can communicate.
