(54) Title: METHOD OF ENHANCING MULTIMEDIA

(57) Abstract: The present invention relates to a method of enhancing multimedia data (24) contained on an information carrier (23). A recording and/or reproducing device (20) is able to read the information carrier (23) and to communicate with a remote unit (10) via a network (15). The information carrier (23) contains additional data (25). The method in accordance with the invention comprises the following steps performed from the information carrier (23):- reading a user file (22) containing user data defining user's previous actions in a storage unit (21) of the recording and/or reproducing device (20),- providing the additional data (25) as a function of the user data, and- updating the user data to reflect the user's latest actions.
