(54) Title: INHALATION DEVICE

(57) Abstract

A blister pack assembly for an inhaler for administering powder containing medicament by inhalation, comprising: a suction tube (7) through which powder is in use drawn on inhalation by a user; and a blister pack unit (5) comprising a blister pack element (11) which includes a plurality of blisters (12), each containing a dose of powder containing medicament, and an attachement member (13) disposed to one side of the blister pack element (11) to which the suction tube (7) is attachable when not in use.
