CLAIMS

1. A haircare appliance comprising a handle and a user interface comprising at least one user operated button wherein the handle has an elliptical cross section having a major axis and a minor axis wherein the user interface is provided on a first vertex of the major axis and the handle additionally comprises a further user operated button and the further user operated button is provided on a second vertex of the major axis, wherein the appliance further comprises an attachment for connection to the handle, and wherein the further user operated button operates a mechanism for removing the attachment from the handle.

2. An appliance according to claim 1, wherein the user interface comprises three user operated buttons.

3. An appliance according to claim 2, wherein the three user operated buttons are arranged in a triangular configuration.

4. An appliance according to claim 3, wherein each of the three user operated buttons are disposed at a vertex of the triangle.

5. An appliance according to any of claims 2 to 4, wherein a second of the three user operated buttons comprises an on/off switch.

6. An appliance according to claim 4 or claim 5, wherein a second button is disposed at an apex of the triangle.

7. An appliance according to claim 6, wherein the second button is on a vertex of the user interface distal to the further user operated button.

8. An appliance according to any of claim 5 to 7, wherein a first and third of the three user operated buttons are radially spaced around the handle.

9. An appliance according to claim 8, wherein the first and third buttons form a base of the triangle.

10. An appliance according to any preceding claim, wherein the handle has a first end and a second end.

11. An appliance according to claim 10, wherein the attachment attaches to the handle at the first end.

12. An appliance according to claim 11, wherein the further user operated button is adjacent the first end.

13. An appliance according to claim 11 or claim 12, wherein the user interface is longitudinally spaced from the first end of the handle.

14. An appliance according to claim 13, wherein a second button is provided and the second button is distal to the first end of the handle.

15. An appliance according to claim 14, wherein the hair care appliance is a hot styling appliance.
