(54) Title: SIMULTANEOUS UPLINK TRANSMISSION IN MULTIPLE TRANSMIT-RECEIVE POINT CONFIGURATION

FIG. 3A

(57) Abstract: A method of wireless communication includes transmitting, upon determining that a wireless device operating in a multiple transmission reception point wireless configuration with a network device satisfies a condition, one or more uplink control transmissions using codebook based precoding. The one or more uplink control transmissions are performed according to a configuration information received from a network device that indicates one or more sounding reference signal (SRS) resource sets associated with the one or more uplink control transmission.
