IC MOUNTING/DEMOUNTING SYSTEM AND MOUNTING/DEMOUNTING HEAD THEREFOR

ABSTRACT OF THE DISCLOSURE

An IC mounting/demounting system in which a centering tool 27 including a socket pusher 27c and a centering recess portion 27b constructed integrally with the tool is detachably attached to a head body 57. Also provided is a centering tool stocker for supporting a plurality of centering tools. This construction eliminates the need for the replacement of a mounting/demounting head with each change of the kind of IC, thus enhancing working efficiency.
