(54) Title: ARMOUR MODULE FOR VEHICLE

Fig. 3

(57) Abstract: The present invention relates to an armour module (1) for a vehicle. The armour module comprises a plurality of flexible vertical elements (3a, 3b, 3c), a plurality of horizontal slats (5) and a connection arrangement (35) for supporting the armour module in a stand-off relation to the vehicle. Both the armour and its support may be flexible and can resiliently deform in response to an impact and thereafter recover.
