. Refrigeration Lubricants

A lubricant comprising
as a main component an ester(s) obtained by reacting (a) at
least one polyvalent alcohol selected from the group consisting
of pentaerythritol, dipentaerythritol and tripentaerythritol
with (b) at least one straight chain or branched-chain
monovalent saturated fatty acid having a carbon number of 2-18.

This lubricant is used for compressors using a
hydrofluorocarbon refrigerant containing no chlorine.
