(54) Title: TECHNIQUES FOR ENABLING LEGACY NETWORK ACCESS RESTRICTIONS

FIG. 9

(57) Abstract: Various aspects of the present disclosure relate to techniques for preventing bidding down attacks. A network entity (NE) is configured to receive an indication of a network access restriction enforcement capability of a UE, receive a handover request for the UE, determine network access restriction information for the UE, transmit the network access restriction information to a network entity associated with a different network, and transmit a handover command comprising the network access restriction information to a base station associated with the UE for processing the handover request according to the network access restriction information.
