

Lighting Apparatus for Simple Installation and Replacement Device Thereof

ABSTRACT

A lighting apparatus for simple installation and replacement device thereof is provided. The lighting apparatus includes a light source and a fixing device, wherein the
5 light source is installed on the fixing device and the fixing device is compatible with the current mounting base for the current fluorescent lamps, so that the light source can be mounted on the current mounting base without the need to modify or reconstruct the current mounting base so as to install the lighting apparatus in a convenient manner.
