## ABSTRACT

### TSL-1502 COMPOUND PHARMACEUTICAL COMPOSITION

The invention is related to a TSL-1502 pharmaceutical composition, wherein the composition is a pharmaceutical composition consisting of the compound TSL-1502 and temozolomide, cisplatin, carboplatin, irinotecan. The preparation method of the pharmaceutical composition according to the invention comprises the following steps of: preparing the required amount of TSL-1502 and another anti-tumor drug together or respectively as pharmaceutical active ingredients into a pharmaceutical composition which can be taken according to the conventional technology of pharmacy. The dosage form includes injectable preparation. The invention studies the combined therapy of TSL-1502 and other drugs, and surprisingly finds that TSL-1502 and temozolomide, cisplatin, carboplatin and irinotecan have synergistic effect.
