

## ABSTRACT

An elastic water-absorbing floor mat (10), disposed at the bathroom or at the door,  
5 comprising an anti-slip layer (12) and an elastic layer (14), wherein the anti-slip layer (12) is  
made from a foam material having anti-slip effects and is attached to and disposed on the  
floor, the elastic layer (14) is made from a foam material having water absorbing effects and is  
attached to and disposed on the top of the anti-slip layer (12), and the surface of the elastic  
layer (14) is provided with a plurality of failure regions (22) that are generally rough and in  
10 the form of broken holes. The elastic water-absorbing floor mat (10) can quickly absorb water,  
and is soft to step on and non-slip.
